NURTURING LIVES

Health Status in Multan

The city of Multan with its poor suburbs and far flung areas is deprived of proper health care facilities. This is mainly due to less allocation of budget for health, education and human resources. The health care provided in various hospitals within the reach of the common man, is far from satisfactory. In fact, the majority of the ordinary every day health problems magnify to chronic illnesses mainly because of lack of either the infra structure or human resources.

The misery of a family member due to the burden of some illness to the loved one is quite common and it becomes more obvious when they hail from the impoverished section of the society.

About us

The Laeeque Rafiq Foundation was established with the objective to provide maximum medical relief to the poor and needy community particularly the women and children. To achieve the goal, the Foundation is building a hospital - Laeeque Rafiq Hospital (LRH) where quality health care will be provided to everyone, irrespective of their paying ability.

The proposed hospital is located in the outskirts of the southern side of Multan City and is spread over an area of 2.25 acres, with plans to build a multi-storey and multi-disciplinary hospital, research center and an educational institution. The site is surrounded by a number of small towns like Lar, Qasba, Basti Malook, Muneer Abad, Gardez More, Gulabi Wala etc. The population of such neighboring towns is about 1 million which has been deprived of the basic health facilities.

The LRH is only the beginning. Our sights are set on attaining a much higher level of medical care provision to the people of the region. Future plans include initiation of mother and child charitable dispensaries at far flung areas and mobile basic health units. These will be in constant touch with the hospital both for administrative and medical matters.

Vision

To provide the best health care to all people of this region, with special emphasis on the mother and child, irrespective of their socio-economic back ground.

Mission

A comprehensive healthcare system that will provide both primary and tertiary care to all, especially mothers and children, which will improve the existing conditions and give the people a healthier and a safer life to live.

'Laeeque Rafiq died at a very young age due to cancer. With empathy in his young kind heart he sincerely aimed to serve the poor society in every way possible.

The memory of Laeeque Rafiq stands as our motivation that to serve humanity is to serve the Almighty.'

The Hospital

The Laeeque Rafiq Hospital (LRH) will play a vital role in terms of the services of diagnoses and treatment and will mainly focus on the mother and child health as the mortality rate of women and offspring during pregnancy is high.

Over a period of 2 years, in four phases, we plan to, with the will of Allah (SWT), increase both the inpatient and out-patient facilities. Our current target is to make this a 100 bedded hospital.

We intend to provide excellence driven, compassionate and ethical medical services to those in need. By branching out into the community through charitable mother and child dispensaries and mobile basic health units, the LRH will stand as a beacon of hope for the people. A network of such health care units will be linked to the hospital and all measures taken to ensure a continued improvement in the day-to day running and quality of the care provided.

Alongside the infrastructure, our aim is to provide the best possible medical expertise in terms of human input. The plan to recruit the best minds in the field of medicine and its sub-specialties is also in the offing.

The Services

- Emergency
- Blood Bank
- Out-Patient Department
- Physiotherapy
- Laboratory
- Radiology
- Vaccination
- Indoor 100 Beds
- ICU/NICU
- Seminar / Research Room
- Pharmacy
- Prayer Area
- Cafeteria
